

Pee Dee GIS User Group Meeting

Wednesday, November 20, 2013

Florence County Doctors Bruce and Lee Foundation Library
509 South Dargan Street
Florence, SC 29501

AGENDA

10:00 **Welcome** - Approval of August 2013 Minutes

10:10 **Local Agency Data Collection (LADC)**
Donny McElveen & Emily Watts - SCDOT

Local Agency Data Collection (LADC) is a process developed by SCDOT with the purpose of creating an updated and more accurate set of line data by combining data sets from the counties and SCDOT. Using specially developed spatial tools, we are able to use GIS software to match records from two data sets and move information from one to the other. This creates a more accurate line set for the DOT and allows counties to receive a more accurate proportion of funds based on the most up to date mileage and assist in collecting data required by MAP-21.

Donny McElveen has over 42 years of total service with the State of South Carolina, 40 of which have been with the South Carolina Department of Transportation. Mr. McElveen has managed the GIS/Mapping Office since 1999. As the manager of the GIS/Mapping Office, Donny has played an integral role in the development of many enterprise applications, including the Hurricane Evacuation System, the Roadway Information Management System (RIMS), the Integrated Transportation Management System (ITMS), Local Agency Data Collection (LADC), Planning Screening Tool (PST), Over Size Over Weight (OSOW) and the Statewide Mapping Project. He is also on the Geographic Information Council Technical Committee.

Emily Watts has over 4 years of experience in GIS and Mapping. She graduated from the University of South Carolina with a degree in Geography. Mrs. Watts then began working for South Carolina Department of Transportation (SCDOT) as a GIS Analyst in the GIS/Mapping Unit. During her time at SCDOT she has been involved with annexations, city and county maps, traffic flow data, external web site, HPMS, NHS, and LADC projects. Her main focus has been assisting in the development and testing of the LADC project.

11:00 **Break**

11:15 **Membership Update, Financial Report & Poster Contest**
 • **Bring and discuss your poster to be voted on by members; prizes will be awarded to winners!**

11:45 **Lunch Break – *Lasagna, Salad and Rolls catered by Stefano's***

12:00 **Condos: the Myth, the Legend, and the Headache**
Reggie Sanders, Florence County Tax Assessor's Office

Condos have been, with most counties, a problem. How to handle them? Best practices for mapping them in ARC? How hard to bang your head against your desk when dealing with them! This is a presentation discussing Florence County's mapping approach to the infamous horizontal property regime aka condos.

Reggie Sanders is a G.I.S. Technician and has been with Florence County for 14 years in the tax assessor's mapping department. He's a mapper by day, Karate instructor by night and nerd on the weekends.

12:50 **Election Results, Poster Contest Winner(s), Door Prize Drawing and Closing Comments**

Save the Dates

SCARC (SC GIS Annual Conference) – February 10th & 11th 2014 – Columbia SC

**Pee Dee GIS User Group 2014 Dates
(February 26th, May 21st, August 20th and November 19th)**
