Chris Harvey, Public Safety Product Manager, Bradshaw Consulting

Building on the crime analysis practices in use by the department, Fayetteville PD has partnered with Bradshaw Consulting Services to implement a holistic predictive policing solution based on BCS's existing MARVLIS technology. Currently in use around the country by Emergency Medical Services and Fire/Rescue, MARVLIS combines computer-aided dispatch, AVL and communications with GIS analytics to provide real-time forecasts of expected demand and calls for service. Coupling this with the ArcGIS platform leveraging ArcGIS Server, Desktop and the JavaScript API, Fayetteville PD is providing real-time situational awareness to executive and operational staff. This presentation examines the various technologies in place, the challenges of undertaking such an initiative, and most importantly, where do we go from here.
